Ask Me Up

It is a video game of **general knowledge**. The principle is quite simple: **a question, 4 possible answers** ... Choose the right one! You face the computer on a series of 10 questions. Respond quickly and efficiently to accumulate points and win medals that allow you to unlock new questions. You must be very thorough because there are no less than **15 areas** of questioning: **people , sports, geography, entertainment, environment** ... Check your statistics and induce a friend to a duel and take on him!

The game will be released in several **editions** :

- **Demo** : 80 questions, without « duel » mode (free)

- **L** : 300 questions, « duel » mode (1,11 euro)

- **XL** : 900 questions, « duel » mode (3,33 euros)

- **XXL** : 1200 questions, « game» mode, HD drawings, for computers only (7,77 euros).

The game will be released on December 1st on **Android, Linux** and **Windows** devices. Versions are then planned for AmigaOS 4, MorphOS and Mac OS X. **The edition XXL will be released later during 2013.**

Word Me Up XXL, it continues!

Word Me Up XXL is available since lastest summer on 2 new systems: **Mac OS X** (Intel) and **Linux** (Intel).

An interview of Glames, published in the Italian magazine **Bitplane** a few weeks ago, is now online on our website, in English and Italian.
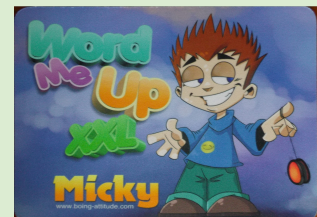

Goodies for Word Me Up XXL.

Mousepads and **mugs** are now in the colors of **Word Me Up XXL**: find the different characters again such as Mr ET (that you can see on the opposite photo).

There are therefore 8 mugs but 9 mouspads because the Splash screen is also present.

Click on **Store** from the home page of the website to access our redesigned online store.

Had you seen it ?

In **Word Me Up XXL** athletics levels, a light panel is regularly visible and displays "**WR 9.58**". This is actually the **100 m record** set by **Usain Bolt** at the World Championships of Athletics in Berlin, 2009.

### How to insert your picture in Word Me Up XXL?

1/ Double-click the game icon to display the start menu. .

**2/** The menu appears. Click on "Setup".

3/ The setup tool will be displayed. Click the "Users" tab and then click the picture of the player that you want to attach a photo.

4/ Select a picture via file selector and then click [Open].

By default, a list of avatars is displayed but you can also insert your own photo. The image must be at least 48x48 points. If it is longer, it is automatically cut or resized by the system. We recommend the use of portraits.

5/ The image is then often displayed in the game such as in the main menu.

⚠️ This feature is not available for **Mac OS X.**
