

BOING ATTITUDE :)

Have fun !

Hello everybody! We hope you had good times and enjoyed your holidays. Boing Attitude team worked all summer to release *Ask Me Up XXL*, our brand new quiz of general knowledge. Already available on OS4, it soon will be on MorphOS and Windows. Have fun!

Ask Me Up range of products is evolving !

Released in late 2012, **Ask Me Up** has continued to grow and multiply: Demo, L, XL, Nantes editions on AmigaOS 4, MorphOS, Windows, Linux, ... And all this in 9 languages!

It required a huge maintenance work to update all versions

So we decided to reorganize the range:

- The **Demo edition** is kept on AmigaOS 4, MorphOS, Windows and Android. The Linux version is no longer supported.
- The **L edition** is no longer supported or available for sale. Buyers received the last update in August (which brought a full translation in all available languages).
- The **XL edition** is renamed **Ask Me Up** and is now only supported and available for purchase on Android. AmigaOS 4, MorphOS and Windows versions will be updated regarding translations but there will be no new features. The Linux version is no longer supported.
- The **XXL edition** was released on OS4. It is intended only to computers and will also be developed for MorphOS and Windows. Mac and Linux versions are under consideration.

- The **Nantes edition** is now dedicated solely to Android. Windows and Linux versions are no longer supported. Please note that Ask Me Up XXL includes a theme about the city of Nantes.

To summarize, Ask Me Up range of products is available now in four editions: **Ask Me Up** and **Ask Me Up Nantes** dedicated to Android tablets and phones, **Ask Me Up XXL** dedicated to computers (AmigaOS 4, MorphOS and Windows) and **Ask Me Up Demo** (Android, AmigaOS 4, MorphOS and Windows).

Along with this reorganization, Polish is no longer officially supported at this time due to lack of available translators.

Ask Me Up Nantes

Ask Me Up Nantes continued to evolve including improved ergonomics. You can now change the avatars or the current user by simply **sliding finger**. A **banner advertisement** is now displayed: every time you click it, it brings us some money and encourages us to continue the development of this edition that is, we remind you, free.
