

BOING ATTITUDE :)

Have fun !

Here comes 2016! We wish you an happy new year. Boing Attitude is proud to present its latest production: *Scores Me Up*, a game wizard for Android phones and tablets. If you play board games, dice or cards, do not wait to use it. Come join the fun!

Glames, Boing Attitude

2015 Retrospective

No BA letter was published in 2015, which does not mean that Boing Attitude team was inactive, on the contrary!

The year 2015 has been very prolific!

Ask Me Up XXL, our general knowledge quiz of 1700 questions has been updated 4 times for computers and became cross-platform! After the AmigaOS 4 version, the game now also works on MorphOS and Windows computers.

Ask Me Up XXL CD was released early October. Including the 3 versions (AmigaOS 4, MorphOS and Windows). It was a huge success since we sold out all our copies. However, you can still buy them from our partners [Amedia Computer](#) and [Alinea Computer](#). The digital version is of course always available through our [online store](#).

Ask Me Up, our quiz for Android phones and tablets, has been updated 3 times with notably, the major 2.0.0 update, released in December, where much work has been done in matter of ergonomics, imagery, ... Make sure to install the latest version to get all the newest content. [Update](#) now !

Ask Me Up Nantes, our quiz about Nantes, France has also been updated

Dir Me Up, our « explorer » for AmigaOS 4, has been updated twice, including an optimized view by icon and thumbnail.

Word Me Up XXL has been updated for AmigaOS 4, to fix a few problems that arose after the AmigaOS 4,1 FE release.

BOING ATTITUDE :)

Have fun !

Scores Me Up was released a few days ago (on January 21) for **Android phones and tablets**. Like a real game wizard, it is the playmate that you missed!

As you can see above, you can easily calculate score when playing **Belote**. But that's not all: it also manages the dice game **Qwixx** and many other games (**Scrabble**, **Uno**, **6 takes!**, **Papayoo**, ...) through its configurable multigame counter.

Scores Me Up is **free** with a possible upgrade to **premium version** (for only **0,99 euro**, VAT excluded).

The **Premium** version of course brings exciting new features like customization of players, team composition, access to all settings, game summary, statistics, records, ...

Many other games are planned: See you in February for the next update!

Here is the dedicated [web page](#).

The 2016 roadmap

The year shoots off with already the release of a new application (**Scores Me Up**) and two updates (**Ask Me Up** and **Ask Me Up Nantes**).

These three Android applications will be steadily improved over the year 2016.

Our productions for computers will not be forgotten with **Dir Me Up** and **Ask Me Up XXL** updates.

And of course, you shall be in for some very pleasant surprises !

BOING ATTITUDE :)

Have fun !

Bip, bip, bip ...

When using one of our applications on Android phones or tablets, **we recommend you do not press the "Power" button** (on/off). The application is quitted without saving the current game on a few phones.

If you need to get out quickly, **use the "Home" button**, which takes you back to the Home screen of your phone or tablet while preserving the progress of your games.

The multigame counter

Scores Me Up allows you to easily customize the multigames counter for calculating points of your favorite games.

Please note however, that **these settings are only available with the Premium version**.

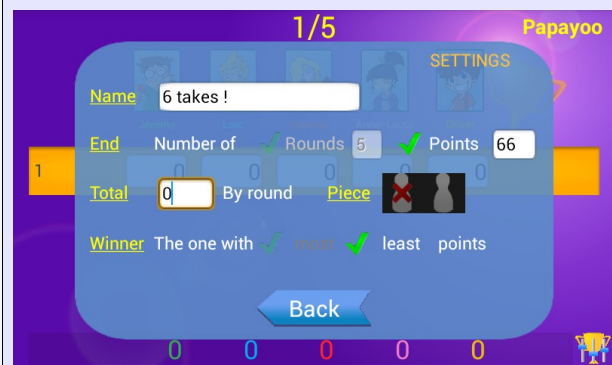

1/ Press the « Games » button on the home screen then select the « MultiGame » counter.

2/ Select players joining the game.

3/ The multigame counter screen is displayed: then press the « Settings » button, located at the bottom right.

4/ The settings screen is displayed :

Please enter the name of the game you want to count. Then fill in the various settings.

For example, let's play « 6 takes ! »: the game ends when one player reaches 66 points. There is no per round total to be distributed between all players: we therefore leave it to zero. There is no piece associated with this game yet so let's choose the strikethrough piece (no piece), The winner is the one who has the least points.

5/ Then press the <Back> button and start the game counting.

6/ When you choose the multi-game counter again, the count screen is displayed with all pre-selected settings: no need to enter them again!

7/ You can press again the « Settings » button, enter a new name (Papayoo for example, a very nice card game) and new settings.

BOING ATTITUDE :)

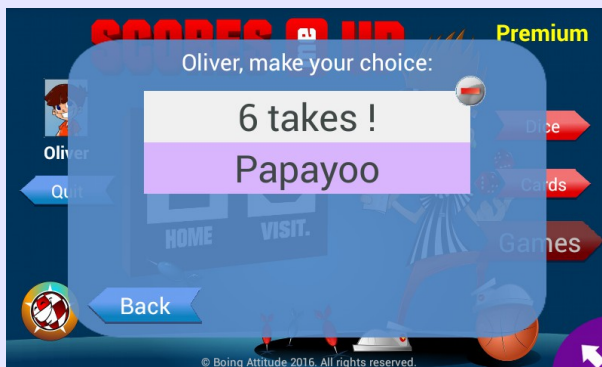

Have fun !

The multigame counter (next part)

8/ Back to the count screen, play the Papayoo game.

9/ When you choose again the multigames counter, a new requester is displayed, allowing you to choose between different settings.

10/ Touch the desired game and voila! You start a new game with the right settings.

Did you know ?

You like our quiz Ask Me Up? You have a Google+ profile? So feel free to join the **Ask Me Up community**. This is the right place to ask questions and be aware of the latest news. [Join us!](#)

The online store

Don't forget the [online store](#) allowing to see at one glance all our productions!

Support Boing Attitude !

The most obvious way to support us is of course to **buy our products**. But there are other possibilities ...

Like or G+ our productions pages on social networks or our web site.

Note the applications when possible. The Google Play Store allows to do it very simply for Android apps.

Show our applications and games to your friends and family. Invite them to play with you. What is better than an Ask Me Up XXL game with 5 friends ?

Speak of our productions to your friends, office colleagues or even your baker!

Share our news in your networks.

Boing Attitude needs YOU !

See you soon ...

This concludes the 6th **BA letter**, one of the larger!

We wish you a very good year again, wishing you the best for the coming months.

Life is short, do not forget it ... So enjoy!

Carpe diem.

**Games,
Boing Attitude**
